Dar es Salaam  
Tanzania

Dear Sir,

**New Project on Plot 1, Kange Industrial Area, Tanga**

We hereby submit our application for a Certificate of Incentives for the new project proposed to be undertaken on Plot no. 1, Kange Heavy Industrial Area, Korogwe Road, Tanga. The project has been planned with a view to improving the sustainability of the woven sack industry with a focus on recycling and value addition to waste. The project will focus on the following product lines:

1. Recycling of Polypropylene (PP) & Polyethylene (PE) waste into high quality granules that can be used for manufacture of household goods and other related products.
2. Conversion of PE granules into planks that can be used as an alternative to wood for decking and furniture, thereby directly reducing the cutting of trees.
3. Conversion of PE granules into stitching twines and ropes, thereby directly reducing usage of new plastic material.
4. Production of yoghurt cups and related products using virgin materials for the dairy industry using the process of Thermoforming.

The total value of the proposed project is US\$ 2.27 million and the project is anticipated to create a minimum of 100 direct jobs as well as multiple indirect opportunities for logistics providers and countrywide distributors of these products.

The full project funding has been secured by way of promoters' equity and loans as well external funding and the timeframe for implementation is estimated at 15-18 months. For the external funds amounting to forty eight percent, the company applied for and received approval for a long-term loan from AgDevCo Limited of Peer House, 8-14 Verulam Street, London WC18LZ, UK. In order to secure the loan AgDevCo's requirement is to register a mortgage over the plot and the company's existing bankers Diamond Trust Bank have already provided their consent to share the security. Thus, we are now submitting our request to TIC to also grant approval for the mortgage in favor of AgDevCo Limited and further authorize the Tanga Land Office to register the same.

Furthermore, the project requires wide span buildings to house the specialized machinery and there is currently no local manufacturer for this type of pre-engineered steel structure. Thus, we humbly request that TIC take the same into consideration and recommend grant of partial import duty exemption on the steel structure.
