RE : RENEWAL OF CERTIFICATE OF INCENTIVE

We acknowledge your letter with reference TIC/PP. 10/04263617.

We humbly wish to tell you that we did not make communication with TIC on failure to start the Project, at that time we expected it would take short time to commence of which it did not perform as required.

For this we beg to apologise for the Inconvenient.

At this time part of the Project has been done such as Construction building workshop , we have already acquired some of the machinery and equipments. We still need some other machinery and vehicles.

We don't expect to have many changes as forty percent (40%) of the Project is done, we will also utilize the funds intended for furniture which is excessive.

Our plan remains the same as the construction has already started on the same premises and share holders remain the same.

Humbly we request your office to consider the renewal of the certificate of incentive, we assure you of good cooperation with TIC as required we take this opportunity to invite you to visit our project at your convenient time.

Find enclosed pictures of workshop building and part of machinery.

It is our entire hope that our request will be considered.

We keep thanking you for your continued support.

We remain

Rolland Sawaya
Director
