

**TANZANIA INVESTMENT CENTRE
DAR ES SALAAM
PROGRESS REPORT**

1. Planned Activities for the period

- a. In addition to the regular upgradation of equipment, the key planned activities for the period are:
- i. Installation and commissioning of new RGB filler at Dar es Salaam manufacturing location,
 - ii. Installation and commissioning of new PET filler at Mbeya manufacturing location and
 - iii. Installation and commissioning of new automatic labeller machine for the PET manufacturing line in Mbeya

2. Achievements made on the project implementation to date

- a. Both above mentioned projects have been successfully completed during Oct to Dec 2020.

5	TIN Information	TIN Certificate No.	100-793-717	
6	Project Objectivity	Project Core Activity	Upgradation and enhancement of production capacities	

As periodic custom audit for Sugar imports and consumption is completed till Apr-20, we request TRA to expedite the refund process and help avoiding liquidity issues. In addition, implementation of the measures announced by Finance Minister in Jun-2017 on refund process, by establishing an Escrow Account may also help getting timely refunds.

- **Problem-2: Water Supply**

- Water Supply from Dawasco is erratic in Dar Es Salaam and no prior information on any stoppages of water resulting in loss of production due to unplanned water stoppages. This is forcing us to purchase expensive water from private operators in Dar.
- Erratic water supply in Mwanza and also at exorbitantly high rate
- Additional charges are being imposed on water drawn from the boreholes.

Proposed Solution: Uninterrupted water supplies and rationalization of water charges would facilitate SBC to protect its margins at the prevailing prices and avoid incurring additional cost towards higher dependency on private operators and transportation of product from other SBC plants to service the market demand.

- **Problem-3: Work Permits**

- High rate of rejection for senior management positions
- “Final grant” in first permit
- Long lead time for approval process
- No clarity on no of positions allowed for our size of operations/business

Proposed Solution: SBC recruits’ talent to support its sustainable business growth objective and hence continuously investing (USD 65 mn in last 5 years) in business expansion. SBC has 1,258 direct employees and 2,000+ of contract employees working in 4 plants and 9 depots across the country. Hence, request to rationalize the allocation of work permits based on the size of business and also to expedite the approval process.

7. Future Plans

SBC is committed to invest in the business growth and expansion and planning to upgrade its production facilities in order to enhance its production capacities. However, we will keep you updated through our six monthly report.

8. Recommendations and any other comments
