Dar - es - Salaam,

RE: SUBMISSION OF REGISTRATION FORM FOR CERTIFICATE OF INCENTIVE

Dear Sir,

Kindly refer to the above captioned subject matter

We are one of largest steel manufacturing company producing international standard (BS 500) steel bars in East Africa with the capacity of 80,000 MT per annum. We proudly supply our 'Made in Tanzania' products to all major construction projects in the country such as railways, bridges, flyovers, water & irrigation projects etc. By doing so, we have been discouraging the imports from foreign countries, adding value to our products and developing skilled manpower within our country as well as providing employment opportunities.

Sir, going forward we will be introducing new advance technology known as Metal Refining konverter/De-Carb konverter unit. It is the latest technology unit installed for the first time in East Africa. Upon commissioning the new technology we will be able to use raw material such as 'Cast Iron' which is currently not used in the country and been exported completely without any value addition. This is going to be the first technology to be placed in Tanzania. Once operational has begun, we will be able to process the 'Cast Iron Scrap' which is currently 100% exported out of the country.

In reference to the above subject we are applying for certificate of incentive for our Metal Refining Konverter/ De-Carb konverter project.

We are enclosing all the required documents along with this letter and that you are requested to please provide your approval for the certificate of incentives at the earliest.

Your kind response in this matter will be highly appreciated.

Thanking You,

You're sincerely,

Kamal Steels Ltd
Director.
