Companies Seal. The Seal cannot be easily seen on duplicated copies. Registration nowadays is done online where the seal is permanently fixed to the online produced certificates. Hence easily seen. I conclude by saying that the applicant is genuine incorporated company on 04th day of July 2014 bearing incorporation no. 109535. I advise that in future an applicant should attach a certified copy of the Certificate of Incorporation from BRELA. This will cure the situation before and after online Registration system.
