Jordan Motorcycle Limited is a project registered by the Centre through Certificate No.043007 of 4th March 2016 with the objective of assembling motorcycles. According to the Project Verification Visit Report submitted from Southern Highlands Zone, the project is progressing on well. So far the project has employed 20 local staff on permanent basis, production capacity is at 1,000 Motorcycles per annum against installed capacity of 4,000 per annum.

Currently the Company is in process to import the second lane of production and two trucks to facilitate running of the project. The project is wholly owned by locals.

Basing on the explanation given in both the PVV and Project progress report I propose the project to be considered for extension for one more year to enable it accomplish its objective to its fullest.

Please I submit for your further process/guidance.
