East African starch Ltd is a project registered to TIC with Certificate of Incentives No. 043345 issued on 1st June, 2017 and to be ended on June, 2020. An investor is requesting extension of the Certificate of Incentives due to the inability to accomplish the project business case as planned towards unavoidable pandemic (COVID-19)

PVV report revealed that the project machines installation has of 95% and few items are underway to accomplish installation by 100% and thus there is a need of additional one year to be able to exhaust list of exemption at fullest.

We have reviewed the submitted shipping documents as shown in the attached PVV report (annexures) and noted that most of the items were ordered between July, 2020 to August 2020 from the manufactures (INDIA). This country was also ^{being} affected by COVID-19 pandemic which might be one of the reasons for not being manufactured timely.

I therefore recommend additional one year to enable the project completion of its business case.

As per above recommendations, this is the 1st extension application from the investor seeking the 4th year of project implementation whereby a 95% of project has been achieved already. As per ZM-SH Rev Final Project's consignments were procured prior Covid pandemic hence shipping process started in July 2020 (attached bill of Ladings). Imported items in shipping were approved by TRTRA (attached List/Approval) hence the period requested will facilitate utilization of the prior approved List. I recommend your approval for 1 year extension period
