

# MINUTE SHEET

Dokezo  
No.

8. **EXD (F8 – F9 & M.6 --M.7)**

Dominick Milling Group Limited has a project owned by locals (Tanzanians) which was firstly being registered to TIC on 16<sup>th</sup> March, 2018 with Certificate of Incentive No. 017098. The project objective is to establish and operate a grain terminal and maize processing plant. An investor requests extension of Certificate of Incentives due to the reason that the project encountered problems including COVID 19 pandemic which affected timely importation of machines as well as engineers who were assigned to install those machines did not come due to the above unforeseen pandemic (refer to annexes 2 &3 of the PVV report).

Likewise the PVV report revealed that the project has not yet being fully operational but some preparations is already done where warehouses/buildings are almost complete. Machines are not yet arrived but buildings are built and almost complete. Based on the PVV report together with the submitted evidence for extension of Col, I recommend TIC to **approve one year extension of Certificate of Incentives** as requested to enable the project completion as per its business case.

Please I submit for your guidance.
