80 EXD - M79

As per our meeting today to discuss this case, we have observed that because CoI can't be given 1.5yrs rather a 1 or 2 years extension then in case investor applies for 1.5yrs, then TIC should consider granting 1yr and continue to monitor project implementation for further consideration if it fail to complete establishment with satisfactory reasons verified. I therefore recommend we grant 1 year extension period. The project has been implemented for 3yrs and this is the first extension request. The project delay was due to delay in obtaining DR and a need to secure new plot for animal feedlot and abattoir which are critical component to the main animal feed production facility.
