Dear Sir / Madam

RE: Kind Request to Change Our Industry Premises location

Reference should be made to our **Certificate of Incentive No. 022306** issued on **05th April 2019**

Argentina Plas Co. LTD is a new founded company which is still under preliminary facilitation stage to establish PVC production industry, where we are now awaiting for exemption approval from TRA so that we can import Plant and Equipment which some are already arrived at the port.

Following our establishment in the country, in the beginning we were in compromise to rent a factory premises at Mikocheni industrial area, which led us to acquired local business license of the same area.

Unfortunately due to some inevitable business and technical circumstances, we had to relocate to Mbagala Industrial area. Among the problems which led to relocation was inconsiderable rental cost, availability of operation facilities and inadequate capacity to accommodate our production, operations and storage access.

Now we are kindly requesting for change of location on our certificate of incentive because TRA did not processes our exemption as the industry premises location is still reading at **Plot No. 23, Mikocheni Industrial Area, Kinondoni** instead of **Plot No. 99, Mbagala industrial area, Temeke**

We hope our request will be considered positively for sake of general economic development of the country

Thank You

For: *Argentina Plas Co. Limited*
