Explanation of problems, which the management is encountering in executing the project and the steps being taken to solve them

Permits/License/Certificates

1. Operating license

Tan Ran Green Energy Ltd recycles waste tires to obtain end products such as pyrolysis fuel oil, carbon black and waste tires, we had tried to apply for a license at EWURA but apparently the petroleum act does not cover the type of petroleum product we will produce. We had been directed by EWURA to consult the Ministry of Trade and Industries and they had directed us to Government Chemist Laboratory Authority and there is where we had applied for a license for the Pyrolysis Fuel Oil. And this too had not been accomplished due to some requirements not falling in our favor.

## 2. Environmental Impact Assessment certificate.

Currently we cannot operate because we haven't complied with the Environmental Impact Assessment regulation which requires us to have an operating license have an operating license from the required regulating authority which is EWURA who doesn't have the regulations suitable to govern our product.

We are had to seek assistance from TIC and we had been given contact of a person in the Ministry of Energy we had been invited to present our project to the assistant commissioner and his assistants

## 7. Future Plans

Explain future plans for the coming six months and planned financial commitments

Tan Ran Green Energy LTD plans recycling waste tires and selling the Pyrolysis fuel oil within the country and a possible expansion in exporting the product as well regarding the availability of the market

## 8. Recommendations and any other comments

We urge relevant authorities of the government to assist investors in acquiring the respective permits to allow them to operate within Tanzania or advise accordingly so as to acquire the rightful assistance before investing capital in their project or so as they opt another project they can invest in.
