The Executive Director,

Tanzania Investment Centre (TIC),

P.O. BOX 938, Dar es Salaam.

Dear Mr. Gilead Teri,

Re: APPLICATION FOR A CERTIFICATE OF INCENTIVES FOR CLAY SAND MINING AND MANUFACTURING OF BUILDING MATERIALS.

We are pleased to submit this application for a Certificate of Incentives under the Tanzania Investment Act, for our proposed investment project in clay sand mining and manufacturing of building materials, to be undertaken by Dodoma Washed Sand LTD.

Our project is aimed at extracting clay sand and utilizing it as a core raw material for producing various construction materials such as bricks, blocks, pavers, and other clay-based building products. The facility will be equipped with modern, efficient machinery to ensure high-quality production and environmental compliance throughout the value chain.

This investment will be in Dodoma region, Chamwino district and is expected to contribute to national development through import substitution, job creation, infrastructure support, and value addition to locally available resources.

We intend to import machinery and equipment essential for the project implementation, and therefore kindly seek the TIC Certificate of Incentives to benefit from tax reliefs and other facilitative services as provided under the investment promotion framework.

Please find enclosed our detailed business plan, company registration documents, project feasibility summary, and other supporting documents as required.

We appreciate your kind consideration and look forward to your positive response. Should you require further details or clarifications, we are available for a meeting at your earliest convenience.

Yours sincerely,

  
.....  
Omary Charles Njoyu

Director - Dodoma Washed Sand LTD.
