Dar es Salaam
Tanzania

Dear Sir,

New Project on Plot no 25, Saibaba Street, Tabata Industrial Area.

We hereby submit our application for a Certificate of Incentives for the new project proposed to be undertaken on Plot no **25, Saibaba Street, Tabata Industrial Area**. The project will be based on trading and manufacturing of goods. The project will focus on Manufacturing of Liquified Petroleum Gas Cylinders and allied steel products.

The total value of the proposed project is US\$ 2 Million and the project is anticipated to create a minimum of 200 direct jobs as well as multiple indirect opportunities for logistics providers and countrywide distributors of these products.

Furthermore, the project requires wide span buildings to house the specialized machinery and there is currently no local manufacturer for this type of pre-engineered steel structure. Thus, we humbly request that TIC take the same into consideration and recommend grant of partial import duty exemption on the steel structure.

Lastly, there is no expertise skills available locally for the machinery operation and quality control of the pressurized cylinders we will manufacture, hence kindly consider giving us 10 permits for expat employment for an initial period of 2 years. After this we will gradually reduce to 5 expats as the process of training the local Tanzanians proceeds.

We look forward to your positive consideration to our requests.

Yours sincerely,

For Ferrotech Africa Limited

(Director)
