### ACHIVEMENTS MADE ON THE PROJECT IMPLIMENTATION TO MADE.

Global Covid -19 pandemic has drastically affect all our operations and plans for the year 2020 but hopefully, if the situation normalizes in 2021, we expect to transport goods and services almost a half of those African countries who are land locked countries

## CHALLENGES AND SOLUTIONS

### Challenges

1. We continue to face stiff competition from other transporters of goods within and outside Tanzania.
2. Corona Virus as well played a significant role in our operations rendering one year of little services while incurring expenses such as salaries and licenses.
3. Infrastructure in some of region is not well maintained.

### Solutions

1. We are actively provided good services to our customers and insuring security while transporting the cargos.
2. We actively advertise to client and agents that Tanzania is safe and open, we have also implement COVID protocol, this make customer use our Harbors as port of destination.

## FUTURE PLANS

- We plan to expand our services all over East Africa and Africa in general.
- To capture the market for East and Central Africa.

## RECOMMENDATION

- We recommend that the government reevaluate local taxes on transporter for they are so many and have become a burden to investors.
