PROGRESS REPORT

1. Planned activities for the period:

We have been involved in manufacturing of steel products which includes nails, square hollow sections, rectangular hollow sections, round steel pipes, steel plates and chain-link fencing material. Our products are manufactured in accordance to TBS standards. The products are sold in the local market as well as to the neighboring countries i.e Rwanda and Malawi.

Furthermore we have been dealing with road haulage services within and outside Tanzania. We provide transport services to our customers to distribute their products from their factories to their main dealers. We mainly transport cold drinks (Pepsi) and Dangote Cement from the manufacturing facilities to their appointed dealers. Some of our trucks are dedicated to transport transit goods from Dar es Salaam port to Zambia, Malawi, DRC, Rwanda and Burudi.

2. Achievements made in the implementation of the project to-date:

Since the inception of our steel manufacturing plant we have experienced a steady and healthy growth in our business. We have expanded our production capacity from an average of 300 tons per month in 2013 to an average of about 1200 tons per month in 2021. The growth in volumes has been achieved by increasing the number of machines and labor force in the company. We have increased additional 2 units of Tube mill machines, 3 units of chainlike fence making machines, 1 unit expanded metal machine, 10 units nail making machines and 1 unit of welded mesh making machine. We constructed an additional 1800 square metres warehouse for storing our machines and finished goods. Consequently we have increased our fleet of trucks and trailers from 85 units in 2013 to 337 units in 2020. We have also invested in earth moving equipment for hiring purposes.

6. Problems and solutions

None

7. Future plans

We intend to add 1 unit of steel roll forming machine. We further plan to keep increasing fleet of trucks to strengthen and develop our transport business. Furthermore we intend to further invest in earth moving equipment for hiring purposes. Last but not the least we would like to introduce a new project for manufacturing concrete paving blocks, culverts and bricks in Mwanza. By adding the asset base and by developing the new project our company will provide additional job opportunities to Tanzanians and increase the tax contribution to our government.

8. Recommendations and any other comments. - None
