

1. Achievements made on the project implementation to date:

- Completed Construction of 2,000 square meters Steel Structure as follows:
Open plan Warehouse 1,200 square meters

- Open plan Factory production area 600 square meters.

- Office Building 300 square meters.

- Others:

Construction to hold 35,000 litres of LPG Gas. The design is such that it allows to receive through LPG dedicated tanker, through suction pump the LPG is offloaded onto the external tank. From the external tank an adjacent construction to hold and shed sieves that enable the LPG odour to be sieved as the plant uses odour free LPG that is channelled through pipeline until inside the blending area.

- Construction to hold and shed 25,000 liters of Alcohol with suction pump and automatic flow from the external tank to inside the manufacturing plant.

- Construction to accommodate 250 kvA transformer and Construction to accommodate 200 kvA generator unit.

- Construction to accommodate water purifying system for drinking water.
- Construction to accommodate water purifying system for turning drinking water to distilled water.

- Construction to accommodate 2 units of atlas copco air compressors with external air storage tank.

- Backfilling and levelling common ground to avoid trucks getting stuck during rainy season when they came to offload containers.

- Open plan warehouse and open plan manufacturing has enabled Fragrance World Ltd to establish state of the art perfume blending, filling and packaging. The entity is fully registered under TBS and their products are TBS approved. Currently 80% sales are local and 20% are being exported to EAC and SADC markets.
