

RUIKEDA PLASTIC TRADING COMPANY LIMITED

(A) BUSINESS PLAN MAP.

FROM THE MAP ABOVE.

As illustrated, we have come up with this business Idea which already on implementations recycling waste plastic into plastic pellets in Tegeta Kinondoni Dar es salaam.

Who are we? And Advantage of having us to the environment and world war against plastic materials. Ruikeda Plastic Trading Co., Ltd main business is waste plastic recycling as the process of recovering scrap or waste plastic and reprocessing the material into useful products, Plastic pellets. Due to the world agenda on plastic control worldwide since the vast majority of plastic is non-biodegradable, recycling is the part of global efforts to reduce in the waste stream, especially the approximately 8 million tons of waste plastic that enters the earth's ocean every year.

The project expansion aim to expand production and waste collection from different parts of Tanzania and neighboring countries.

PRODUCTION PLANING.

The production plan has based on the availability of waste plastic collected per day in all collection centers within the regions as the projected capacity of crushing plastic into scrap is 5tons a day and the recycling into plastic pellets its about 3 to 4.5 tons per day.

ENEGRY CONSUMPTIONS

Monthly our machines consume **7,018.33** unit of power supplied by Tanzania Electricity company TANESCO which in other hand we are good client to the company while reducing the environmental pollution with zero carbon emission, hence government revenues increase.

EMPLOYMENTS CREATIONS

From the map of our business planning as expansion project we will offer the employment to more than 50 local workers daily paid and monthly paid based on the skills of the staff based on machines operations. While the foreigners is approximately 4 from two directors and two others for technical support and training for local works

WATER CONSUMPTIONS.

Our production line consumes 100liters clearing waster plastic which has been crushed also used for cooling the plastic rope when turning it into plastic pellets before cutting to final products.

CONSUMERS OF THE FINAL PRODUCTS

The final products plastic pellets are supplied to Local clients who are the manufactures of plastic products and export to China where the demand is high.

We are supporting the Government initiative on Environmental protection which is the World agenda creating employment and generating income for the community and our company developments.

This business plan has come from the action plan of expanding our project in Dar es salaam of Recycling waste Plastic as really business.
