Re: Request for Two (2) Years Extension of Certificate of Incentives

Reference is made to the above subject.

Windlab is a global renewable development company that was established in 2003 as a spin-off from Australia's premier scientific research institute, the CSIRO. The company has had an active presence in Tanzania since 2015 where we have been actively developing a utility-scale wind farm, commonly referred to as the Miombo Hewani Wind Farm, within Saja Ward, Njombe Region.

Windlab Tanzania SPV 1 Limited (Windlab), a company duly incorporated under the laws of the Republic of Tanzania was granted a Certificate of Investment (copy enclosed) from your office, No. 017155, on 15 February 2019 which was valid for a period of two years.

It was anticipated that the Project would be constructed within the two-year period post registration but has delayed due to the delay in finalization of the procurement process by Tanzania Electric Supply Company Limited ("TANESCO") Tender No. PA/001/2018-19/HQ/N/034/ For Large Wind Power Generating Projects which is a prerequisite to raising finance and commencing construction.

Currently, Windlab is incessantly engaging the village leaders and other relevant stakeholders including financiers as it awaits TANESCO's announcement of the bid winner.

We hereby request for a two (2) years extension of the TIC Certificate of Investment to enable us to progress the project forward upon finalization of the TANESCO tender process.

Please also find enclosed a project progress report with additional details on the project status.

We look forward to working closely with you as we move the development of the Miombo Hewani Wind Farm forward and to build on the cooperation that already exists between TIC and Windlab and do not hesitate to contact the undersigned for any additional questions/clarifications.

Warm Regards,

Peter Venn (Mr)
Managing Director, Africa
