

# WINAFR COMPANY LIMITED TANZANIA SISAL SPINNING MILL

At present, more than 95% of the sisal processing factories in the world are located in China. Such industries face all sorts of problems in China as workers' wages rise and the demographic dividend fades. Go out, in close to the raw material base, place to become the inevitable choice of Chinese enterprises.

Our company has been in Tanzania for 3 years, mainly engaged in sisal fiber procurement, processing, and all sent to the factories in China. In the domestic factories encountered such problems, we are ready to move Chinese factories to Tanzania, Tanga Klorogwe region. A total planned investment is worth 4 million USD (phased investment). Workshop required 25000 square meters. (Built in stages). After production, it is estimated that the annual output of sisal yarn will be 20,000 tons.. Create about 1000 jobs. For Tanzania to pay all kinds of taxes and fees 1-2 million dollars.

Tanzania sisal spinning mill once fully commissioned, will become Africa's largest sisal yarn spinning enterprises, the world's third largest. Can effectively promote the upgrading of sisal industry in Tanzania. Can drive a large number of farms, farmers to expand the cultivation of sisal, processing. It will help Tanzania restore its former sisal glory.

The main products of sisal spinning factory include: sisal yarn sliver, sisal polishing cloth, pet carpet, floor mat. Products will be sold all over the world. Can become Tanzania sisal industry's most beautiful business card.

The building materials needed to build the factory are a combination of Tanzanian local products and Chinese products. All the machines and equipment needed for production are made in China. At present, all kinds of machines for processing sisal hemp in the world are made by China.

Sisal Spinning Plant in Tanzania Proposed Commissioning Date:  
Date: October 2022
