**RE: APPLICATION FOR THE AMENDMENT OF TIC CERTIFICATE OF INCENTIVE NUMBER 20229927 ON SUB SECTOR AS AVIATION BULKY STORAGE FACILITIES FOR JET A1 FUEL FROM LPG FACILITIES.**

Please refer to the heading above; Oilcom Limited is a Tanzanian registered company and one of the key players in premium quality petroleum products across East and Central Africa.

In August 2022 OILCOM signed a contract with Tanzania Airports Authority for construction, installation and management of aviation fuel storage tanks at Julius Nyerere International Airport.

In September 2022 We registered a project with the Tanzania Investment Centre and granted a certificate of incentive number 20229927 with an objective to implement the construction and installation of Aviation fuel JET A1 facilities at the Julius Nyerere Airport. The project value is 17.7 million USD and after completion would improve the Airport Jet A1 storage facilities.

Unfortunately when doing the registration we could not find under the commercial building sector an option on bulky storage facility for Aviation but LPG but our business plan and all the information submitted was on aviation.

We therefore request TIC to amend our certificate for a project sub sector to be on Aviation bulky storage facilities for JET A1 fuel tanks facilities to match with the project objectives.

With this letter we attach the progres report, copy of the original certificate of incentives and

We thank you in advance,

Ally Nahdi  
Chief Operating Officer
