Dear Director General Teri,

**RE: APPLICATION TO BE REGISTERED FOR ALL SERVICES OF INVESTORS**

Let me begin with letting you know how much we at TTC – The Transport Company Ltd. appreciate yours and your team’s swift support over the last couple of months. The communication have been instant and qualitative, allowing us to move on just as swiftly to start up our new business.

My name is Lars Eklund and when we spoke I was still the MD for Scania in East Africa, now my days are numbered. I am leaving that position now by end of August to start up my own transport company in Tanzania together with my local partner Anna Nyimbo that has 20 years of success in running business in Tanzania.

We are in need of the TIC support as we are importing capital intense machinery, mainly trucks and trailers. It will be of essence to have the partial duty relief and the list of approve products for the same asap as we have already purchased out first 12 trucks, due to arrive end of August. I would also like to try to apply for a VAT deferment with the CG or the TRA, as their have been recent updates of the VAT act allowing event some imported goods to enjoy VAT deferment.

I am also in need of a work and resident permit and look forward to assistance and guidance from your organisation.

Over the coming 5 years we intend to employ around 200 people, run 150 trucks and trailers with and investment value of approximately USD15,000,000. This will generate high revenues and thus employee and company taxes for Tanzania.

“Tuku Pamoja”

Lars Eklund
