Greetings from Serengeti.

RE: SERENGETI SMART CITY PROJECT REGISTRATION AND  
CERTIFICATION

Kindly refer to the above heading.

We further our request to register with the Tanzania Investment Center (TIC) as local investors in the area of tourism industry. During our registration processes, there are issues raised by your office for clarifications in the areas regarding the Letter of no objection from TAMISEMI, Evidence of Funds and Shareholders.

One, Serengeti Development Company Limited is a limited liability company and an independent ENTITY. The company has an executive board of directors and hence independent in its operations. The desired investments have got nothing to do with TAMISEMI as are purely commercial with 100% liabilities to SDCL as an entity. That, in our opinion as a company we are not obliged to produce a letter of no objection from TAMISEMI. Kindly, proceed with registration.

Two, the evidence of fund was submitted and further clarifications were made to your offices. However, I can further share copies of

agreements and explanations of the same if you need them again. However, you can kindly proceed with registration.

Finally, it is in opinion and understandings that companies are and may be distinct to projects. That, SDCL as an entity has shareholders who formed the company while Serengeti Smart City Project is an investment project shared by different entities for a purpose of business and trading. It is out of our expectations that the men and women investing in SESCO22 must be the owners of SDCL. The observed difference is well accepted in business platform and should not be regarded as an obstacle to registration. Kindly, proceed with registration.

With this letter, we humbly tender in our request to further the Serengeti Smart City Project registration with the TIC.

Sincerely,
