Ref: MSL/TIC/LSHP/001/2024

Executive Director,
Tanzania Investment Center,
P. O. Box 938,
DAR ES SALAAM

Dear Sir/Madam

RE: APPLICATION FOR A CERTIFICATE OF INCENTIVES

Refer to the heading above.

Multiplex Systems Ltd (MSL), a locally owned and operated engineering company based in Dar es Salaam is the designated developer of Luegere Small Hydropower generation project to generate 5.34MW of electricity. The proposed Run-of-River hydropower plant system site is located approximately 30.028° East and 5.895° South along Luegere River, nearby Rukoma Village, Igalula Ward, Uvinza District in Kigoma Region.

The completed pre-feasibility study supported by the Rural Energy Agency (REA) and the World Bank demonstrates that the river has a potential to generate about 5.34MW of electricity.

MSL's main development and investment objective is primarily to generate electricity and feed to TANESCO main grid under Standardized Power Purchase Agreement (SPPA). So far, the company has accomplished the following critical project development activities:

- ✓ Conducted Prefeasibility studies in 2018.
- ✓ Granted Letter of Intent by TANESCO on May 27, 2022(Luegere/Hydro/SPP/2022/100).
- ✓ Granted a Provisional Water Permit No. 84100425 by Lake Tanganyika Basin Water Board (2022).
- ✓ Granted a customary land title for 150 Acres of Project Land on 11th December 2023.

MSL believes that increasing power generation and transmission capacities still poses a great challenge to the electricity sector in Tanzania which needs concerted efforts to address through collaboration with various stakeholders including public and private sectors institutions such yours, which Multiplex Systems Ltd is well suited to work with along with REA and TANESCO under EWURA mandate.

This strategically important off-grid hydropower project will increase electricity supply and access to 217 out of total 307 villages within Kigoma Region and subsequently feeding to the national grid. In this case, it will contribute directly in achieving national energy objectives which strongly focus on ensuring constant availability of reliable and affordable energy supplies to rural residential, community-based SMEs and industrial manufacturing and processing sectors at large, along with promoting and facilitating clean and efficient energy use in rural communities in order to support National Development goals

In this regard, we are hereby formally introducing our Luegere SHP Project to you and promptly apply for certificate of incentive. Company directors and shareholders are individual Tanzanian Eng. Thomas Leopold Kalunga and Eng. Henry Chezi Kalunga each having 50% of company ownership.

We are looking forward to your kind consideration and positive response for approval on our application.

Sincerely,

.....
Eng. Thomas Leopold Kalunga
Managing Director
MULTIPLEX SYSTEMS LTD.
