**RE: REQUEST FOR THE RENEWAL OF CERTIFICATE OF INCENTIVES NO.043328
FOR INHEMETER T LTD**

Dear Madam / Sir,

We Inhemeter (T) Limited, Located in Kinondoni -Dar es salaam, we were given the certificate of incentive in the year of 2017 for the Smart Meter Assembling factory. We are one of the largest Smart Electricity Meters & Distribution line accessories manufacturer and suppliers to Tanesco & REA.

We have started our first factory to assemble Smart meters in the year of 2018, there after we have started our 2nd unit to manufacture the Polymeric insulators, Surge arrestors & drop out fuses, in the year of 2022 we have opened our 3rd unit to manufacture Insulation piercing connectors (IPC), Starin clamps, Tension clamps & Suspension clamps. We have been supplying all these items to Tanesco & REA. We are now in the process of adding our 4th unit to manufacture the smart meter's outer casing locally for all types of smart meters.

Since our incentive certificate has expired, we would kindly request for the renewal of our Certificate number **043328** granted by Tanzania Investment Centre on 05th October 2017, so that our company can benefit from fiscal incentives including relief of import duty on a project deemed capital and import duty on capital goods with the inclusion of non-fiscal incentives.

We would also request TIC to guide us on the duty exemption for the raw material which we import to produce the above-mentioned items.

We appreciate the effort you have been taking to create better investment environment in Tanzania to different companies and Inhemeter being one of them.

Yours sincerely,

Signature:

ABRAHAM RAJAKILI
MANAGING DIRECTOR
For: **INHEMETER (T) LIMITED**
