RE: APPLICATION FOR CERTIFICATE OF INCENTIVE FOR MANTRA TANZANIA LIMITED

Mantra Tanzania Limited is a subsidiary of Uranium One Group and its parent shareholder, the State Atomic Energy Corporation of Russia (ROSATOM). The company owns the Mkuju River Uranium Project (MRP).

MRP is located in Southern Tanzania in the Namtumbo District of the Ruvuma Region. It is approximately 180 km North-East of Songea town and 54 km from the nearest human settlement which is Likuyu Sekamaganga village in Likuyu ward. The prospect area is located in the southern part of the former Selous Game Reserve which is now part of Nyerere National Park.

The project is now planned to start a pilot plant production in, 2024.

Mantra Tanzania Limited received approval from TIC for Special Strategic Investors Status on 17th September 2015 and we have been applying our expatriates permits through TIC since this approval.

We have searched in all our records to check and verify if we have a Certificate of Incentive but we have no records on our system, only the Approval Letter. A copy of the Approval Letter is attached herewith for easy of your reference.

We therefore kindly apply to be issued with a Certificate of Incentive and your good office to continue with work permit application for our expatriates pending this application. Enclosed herewith are relevant documents in support of our application.

We look forward for your favourable consideration of this application and thank you in advance.

Yours Sincerely,

Jerome Mashamba
Head - Human Resources
