DIRECTOR GENERAL,
TANZANIA INVESTMENT CENTER,
P.O.BOX 938,
SHAABAN ROBERT ST, DAR ES SALAAM, TANZANIA.
Dear Sir/madam,

RE; APPLICATION FOR NEW CERTIFICATE OF INCENTIVES

Kindly refer to the above subject. The company Matundasi ASM Development Co. Ltd. (MADC) was founded in 2008 and is fully owned by Tanzanian locals. Its primary areas of expertise are exploration, mining, trading and project development, with a focus on gold, industrial minerals, coal and quarries. The MADC Sister Companies of PaulSam Geo-Engineering Company Ltd (PSG) and Kimani Exploration and Geotechnical Services Ltd (KEGS) have been supporting MADC through logistics and technical support in order to help MADC develop its mineral rights in Chunya and Songwe Districts in the southern part of Tanzania. MADC currently is embarking on expanding its mining operations by investing on a medium scale operation of producing 540t/month growing to 2000t/month production of copper concentrate for export to China and more than 20kg/month of gold that will also be exported to China.

Based on this development, MADC is requesting a certificate of incentive from your honorable office to expand its operations and increase its return to the government and the community at large. The application is submitted with the following attached documents; Business Plan, Board Resolution Extract for both MADC and PSG, Evidence of Land, Company Certificate of Incorporation and TIN Certificate, MEMATS of both MADC and PSG, Evidence of funds for the project and Evidence of paying the TIC application. A contract of sale of concentrates to our overseas market in China is available upon request from your office.

In the context of correspondence, get in touch with MADC Executive Chairman; Dr. Samuel G. Mafwenga-0657989949 and MADC Director; Paul Gongo-0759372862.

We anticipate your unwavering assistance during this entire process.

Yours faithfully,

Dr. Samuel G. Mafwenga,

Executive Chairman
