<b>Total Investment</b>		

#### 7. Problems and Solution

- During project implementation we encounter land crisis over land ownership in our local area which delayed our project implementation process.
- Crisis over land which forced to abandon land and purchase new one
- There is no running DAWASA water in the area
- The road to the factory is rough
- Power failure especially whenever there is rain, they cut the power

#### 8. Future Plans

During the coming six months the company has planned to fast-track the following activities:

- Finalize construction of the farm

- Finalize importation and installation of plant machineries
- Procurement of Raw materials
- Hiring of staff
- Commence production of cattle fattening for beef and dairy processing
- By November 1<sup>st</sup> we will start installation/commissioning of the plant/machineries.
- We expect to start production on 1<sup>st</sup> December 2024

## **9. Recommendations and any other comments.**

We are pleased to be members of the TIC. Since we started, we have received good collaboration from staff and high management of all government institutions. During this period, we maintained regular communication with the TIC officer assigned to our case. We provided updates on the project's progress and the difficulties we encountered. Despite our best intentions, circumstances beyond our control prevented us from moving forward. In our new land we demonstrate our commitment to utilizing the land effectively, We kindly request that the TIC consider re-issuing our certificate of incentive for a period of five years, in accordance with the provisions of the new investment act hence what happen was beyond our control, we look forward to support government's vision on Agriculture industry. We are optimistic and committed to make this project a reality come December 2024.
