Appreciation:

We appreciate the support from Tanzania Government, by accepting our Professionalism in investment in this sector and digitalizing Booking system through the internet that is accessible and any there. The progress made in the transport sector is a testament to the government's commitment to driving growth, sustainability, and inclusivity. The investments in infrastructure, policy reforms, and focus on safety, sustainability, and accessibility have created a more efficient and equitable transport system. This removed some of the obstacles which have held us back from developing in the marketplace.

Future plans

To carry on and expand to all or any of Business transport, carriage, haulage contractor and increase fleet.

To carry business as tour operators, tourist agents, safari contractor organizers and operate tours. And operate as clearing and forwarding agents for bus spare parts and consulting services upon this industry

Recommendation and any other comment

The major problem is Diesel fluctuation in prices that leads to increase in operational cost in our business.

We appreciate the government of Tanzania through Ministry of Construction and Transport on introducing and implementing new policies that like online ticketing.

Yours Faithfully

田莹
