DAR ES SALAAM, Tanzania

Dear Director General,

RE: APPLICATION FOR CERTIFICATE OF INCENTIVE: ESTABLISHMENT OF A PESTICIDE MANUFACTURING AND FORMULATION ENTERPRISE

We hereby write to your good office to formally apply for a Certificate of Incentive for our proposed project to establish a state-of-the-art pesticide manufacturing and formulation facility in Tanzania.

Our core mission is to enhance national agricultural productivity and food security by providing Tanzanian farmers with timely, effective, and locally-produced crop protection solutions. This project directly addresses the critical challenges farmers and agro-dealers face due to global shipping uncertainties. By manufacturing locally, we will drastically reduce lead times from months to weeks, allowing for better resource allocation across the agricultural value chain.

We are committed to quality and safety, and a key component of the facility will be a certified laboratory to ensure all products meet strict standards.

We are confident that this enterprise aligns with Tanzania's goals for agricultural development and economic self-sufficiency.

The detailed business plan is attached for your comprehensive review.

We look forward to your positive consideration.

Yours faithfully,

Keran Kapoor
Managing Director
