6. Problems and Solutions

- Unpredictable tax environment we are always facing some issues with TRA like repetitive queries, wrong tax demands, and visitation of several TRA officers at different times who are following up the same issues or issued which we have already addressed to them in our returns.

- Untimed electricity supply shedding; the remedy which we have taken on our side we bought stand by electricity generator.

7. Future Plans

Given the opportunity at hand, our company plans to expand the plant's capacity by closely collaborating with artisanal miners to process their ores. This initiative will align with our broader development goals, including constructing additional infrastructure and creating more employment opportunities.

8. Recommendations

We recommend the government to continue improving investment climate to enhance smooth implementation of our investment projects.
