Re: **Application for Certificate of Incentive for a 10MW Solar Power Project in Mkinga District, Tanga Region**

We, GC Green Excellence, a renewable energy development company with majority shareholders from Poland, are pleased to submit our application for a Certificate of Incentive for our 10MW solar power project currently under development in Mkinga District, Tanga Region. Our company is committed to supporting Tanzania's energy sector by investing in sustainable and clean energy solutions that align with the country's energy policies and development goals.

As part of the project development process, we are currently undertaking land valuation to facilitate the compensation of affected landowners. Consequently, we do not yet have final land ownership proof at this stage. However, we wish to assure TIC that all legal and regulatory processes regarding land acquisition are being diligently followed in collaboration with relevant government authorities.

To demonstrate the viability and progress of our project, we attach a copy of the Letter of Intent (LOI) issued by the Tanzania Electric Supply Company Limited (TANESCO), confirming our engagement in the development of the solar power plant. This LOI serves as key evidence of our project's legitimacy and its alignment with Tanzania's renewable energy objectives.

We kindly request TIC to consider our application favorably and grant us the Certificate of Incentive, which will enable us to benefit from the available investment incentives and facilitate smooth project implementation. We appreciate TIC's continued support in fostering foreign direct investment in Tanzania and remain available for any further information or clarification required to process our application. We look forward to your positive response.

Yours faithfully,

Eng. Geoffrey Nangay

Project Manager
