## **RE: REQUEST FOR CHANGE OF INVESTMENT PROJECT**

We refer to our previous investment application submitted to your esteemed office by Zhongji Investment Company Limited.

Following further consultations and internal evaluation, we regret to inform your office that the initially proposed investment project has encountered significant challenges in obtaining the necessary permits and approvals required for its implementation. Due to these circumstances, the project could not proceed as originally planned.

After careful consideration, the Board of Directors of Zhongji Investment Company Limited has resolved to revise the company's investment plan and change the project to a new industrial manufacturing project.

The new proposed investment project will focus on the **manufacture of pulp, paper and paperboard**, which will involve the production and processing of paper-related materials for use in packaging, industrial applications, and other commercial uses.

This project is expected to contribute positively to Tanzania's industrial development by promoting local manufacturing, creating employment opportunities, and supporting the supply of paper products within the domestic and regional markets.

We therefore kindly request your office to allow us to amend our initial application and proceed with the new investment project under the manufacturing sector.

Please find attached the Board Resolution approving the change of the investment project.

We appreciate your continued cooperation and support and look forward to your favorable consideration.

Yours faithfully,

DIRECTOR  
ZHONGJI INVESTMENT COMPANY LIMITED
