The Director General
Tanzania Investment and Special Economic Zones Authority (TISEZA)
Dar es Salaam, Tanzania

Dear Sir/Madam,

RE: APPLICATION FOR REGISTRATION UNDER TISEZA

On behalf of Rahami Agri Group Ltd, I am pleased to submit our application for registration under the Tanzania Investment and Special Economic Zones Authority (TISEZA). We are confident that our project aligns strongly with the Investment and Special Economic Zones Act and will make a significant contribution to Tanzania's national priorities of industrialization, export growth, rural employment creation, and local value addition.

Rahami Agri Group Ltd is a women-led Tanzanian agro-processing company, registered in 2016 with the primary aim of adding value to agricultural produce to achieve socio-economic gains while protecting the environment. Since 2022, Rahami has focused on transforming the cashew value chain, transitioning Tanzania from raw export dependency to value-added processing, zero-waste manufacturing, and digital traceability. To date, we have processed over 800 tonnes of raw cashew nuts, generated over US \$1 million in cumulative revenue, and established strong relationships with 300 farmers and six international kernel buyers in the USA, Turkey, and Saudi Arabia.

Our proposed project involves establishing a decentralized network of six modular micro-factories integrated with a 5,000-tonne central secondary processing facility in Tandahimba, Mtwara. This innovative model brings processing closer to farmers, reduces logistics costs, and directly benefits rural communities.

With a planned investment of USD 2.25 million over the next five years, we project significant economic and social returns:

- Processing 15,000 tonnes of raw cashew nuts (RCN) annually by 2030.
- Generating US \$25–30 million in annual revenue by 2030.
- Creating over 400 direct jobs (70% held by women) in rural cashew-growing regions.
- Integrating 5,000 farmers into sustainable value chains

P.O. Box 11247, Masaki, Dsm, Tanzania

Rahami's commitment to sustainability and traceability makes our project particularly compelling. Our zero-waste production approach, which leverages CNSL extraction and biochar production, coupled with a sophisticated digital traceability platform, positions us to generate carbon credits and attract climate finance. This commitment also ensures that we deliver premium, ethically sourced cashew products to discerning global markets.

Registration under TISEZA is critical to Rahami's success. The investment incentives, import duty relief, and tax exemptions will strengthen our competitiveness against larger international processors and accelerate the scaling of our decentralized factories across Southern Tanzania. This, in turn, will enhance Tanzania's regional and global positioning in the premium cashew market.

We have included all required documents to support our application, including:

- Certificate of Incorporation
- TIN Certificate
- Updated Business License Board Resolution authorizing TISEZA registration
- Detailed Business Plan and Project Profile
- Land title deed for processing sites
- Financial projections and investment plan
- Memorandum of Understanding

We are confident that Rahami Agri Group's project represents a strong investment opportunity for TISEZA and will deliver significant economic, social, and environmental benefits to Tanzania.

We welcome the opportunity to provide further information and discuss our application in more detail.

Thank you for your time and consideration.

Yours faithfully,

A handwritten signature in blue ink, appearing to read 'Rahma', is written over a faint circular stamp.

Rahma Othman Jawa
