2.5 FACILITATION DESK

This desk will act like a reception center for all enquiries about the SANSUM INVESTMENT CO. LIMITED.

2.0 PROJECT LOCATION

The Project is located at **Plot No.86, Visiga, town Council, Kibaha District – Coast Region**. Location is the most crucial factor for the success of warehouses. Any investor investing in a warehouse will definitely want to reduce the cost of transportation in both ways i.e., for export of goods produced and import of raw materials.

3.0 INDUSTRIAL TRENDS

The Analysis conducted revealed that in Tanzania currently there is a lack an adequate warehouses facility with full facilities to accommodate the growth of manufacturing sector in. SANSUM INVESTMENT CO. LIMITED project come up with the proposed potential options for addressing this shortage.

Warehouse facilities are an important tool for attracting investment and technology, given that some of the key factors that influence investment decisions are the availability of land, infrastructure, quality services and proximity to strategic markets. The technology transfer opportunities that foreign investment in particular can bring to an economy are crucial to improving production capacity through the associated transition from labour-intensive to technology-intensive production that often accompanies it.

- **Regional and national development:** Contributing to regional and national development is often a primary driver of the decision to establish warehouse facilities that foster new investment, industries, jobs, linkages and growth.
- **Improving the business environment:** Warehouse facilities can improve companies' productivity by reducing production costs, reducing waste and pollution, and generally increasing economic opportunities.
- **Fostering innovation:** Warehouse facilities create environments that foster collaboration and innovation by

providing a location where the government, the private sector and universities and research institutes can collaborate, as well as conduct and commercialise research and reinforce entrepreneurship. Warehouse facilities can also support entrepreneurs by incubating new businesses. The shared services offered by warehouse facilities can moreover reduce small business market entry barriers and facilitate access to seed capital

- Economic experimentation and demonstration. Warehouse facilities can serve as a test of economic reforms, new policies and approaches in a geographically-concentrated pilot area. Their demonstration effects can then, if successful, be replicated nationwide, along with the best practices drawn from these pilots and their demonstration effects then being applied to other industrial locations and businesses
- Community development. Industrial parks, as local economic hubs and growth centres with certain positive externalities, can (when properly designed) serve as platforms for delivering on broader local community goals, such as local employment creation, as well as transportation services, education and training, health care, mail and communication services, and others
- Promoting environmental safeguards. Warehouse facilities can offer the opportunity to decrease production costs

through common infrastructure and systems, while also leading to increased materials, water and energy efficiency, including through waste recycling, water management and resource recovery. Eco-warehouse facilities can further reduce pollution and waste by applying pollution prevention, renewable energy, industrial symbiosis, and other environmental management methods and technologies.

4.0 THE MARKET

4.1 General Market Review

Market observations in reveal that there is still high demand for high quality industrial premises with readymade infrastructure, quality workmanship, quality design, and services available and affordable price are basic factors to attract investors in the industrial park.
