	lighting and power sources for drying and other farm operations.	we constantly using diesel as source of power and farm operations. Due to weather conditions, Solar system is not the ideal option for now.	by establishing power distribution line to be able to supply electricity to the farm site and all villages around the farm	
ii	2. Proper and passable roads to access the farm and ferry our flowers from the farm site to the factory at Mafinga	<ol style="list-style-type: none"> 1. Delays in production and harvesting on time. 2. High Maintenance Costs on vehicles and trucks 3. Hard to ferry labour from nearby village to the farm due to absence of smooth transport and passable roads especially during seasons. 	TARURA to investment in seasonal repairs and maintenance of the roads to ensure they are regularly and conveniently in use to support the farm operations all the time and help the company run its operations economically and profitably.	
iii	3. Inadequate Labour supply to the farm	Delays the farm operations which are time sensitive and seasonal.	Ones the government provide adequate and reliable infrastructures and social services around; it will attract many people to establish their residences around within the nearby villages hence slowly the population within the village will gradually grow and company will be assured of reliable and sufficient labour supply.
