**ESTABLISHING AND OPERATING A FOAM AND SPONGE
MANUFACTURING PLANT AT PLOT 94, KAZOLE, VIKINDU, MKURANGA, PWANI
REGION, TANZANIA**

1. BUSINESS PROPOSAL

This Business Plan has been prepared by **M/s Kerui Company Limited** for a proposed Foam and Sponge Manufacturing Plant to be located at that property currently known and registered as Plot 94, Kazole, Vikindu, Mkuranga, Pwani Region, Tanzania.

The Business Plan has been prepared to manifest and analyze the financial and other resources required for the implementation of the proposed business and also assess its economic viability and commercial viability for presentation to the Shareholders of M/s Kerui Company Limited and external parties including financial institutions, the revenue authority and potential investment partners. Key to this presentation is the allocation of funds so as to supplement the equity contribution.

2. COMPANY'S BACKGROUND

M/S Kerui Company Limited is a private company registered / incorporated in Tanzania by Registrar of Companies.

The company's shareholders seek to invest and develop a Foam and Sponge Manufacturing Plant under the auspices and guidance of the Tanzania Investment Center at premises to be constructed at Mkuranga, Pwani Region, Tanzania.

Mkuranga is home to a variety of small and medium sized businesses, including wholesalers, retailer stores, milling equipment, restaurants, butchers, pharmacies, garages, gasoline stations, guest rooms, local bars, salt farms, hardware stores, slaughterhouses, and bars especially in the wards bordering Dar es Salaam region. There has been a notable increase in investment of light industries in the region where investors have been attracted by favorable investment climate, nearness to Dar es Salaam and its Port leading to regional and international export

A fact sheet on the port of Dar es Salaam shows that Dar es Salaam port is the Tanzania principal port with a rated capacity of 14.1 million (MT) dry cargo and 6.0 million (MT) bulk liquid cargo. The Port has a total quay length of about 2,600 metres with eleven deep-water berths. Dar es Salaam port handles about 95% of the Tanzania international trade. The port serves the landlocked countries of Zambia, Democratic Republic of Congo, Burundi, Rwanda, Malawi, Uganda and

Zimbabwe. The port is strategically placed to serve as a convenient freight linkage not only to and from East and Central Africa countries but also to middle and Far East, Europe, Australia and America.

Facilities available to support operations of Dar es salaam port are as follows:

General cargo Berth (0-5) for break bulk, dry bulk and one RORO berth to handle vehicles. Container Terminal Berths (Berth 5 -11) Grain Terminal facility (silos with storage capacity of 30,000 tons). Inland Container Deposits (ICDs) facilities with the capacity of 24,300 TEUs and CFs with the capacity of holding 6,000 vehicles at once. A 150,000 MT Single Point Mooring (SPM) – for handling refined and crude oil. Kurasini oil Jetty (KOJ) for handling refined products (tanker size 45,000MT for KOJ1 and 5,000 tons for KOJ2).

Generally, the intrinsic capacity of the port of Dar es salaam is to handle more than 18 million tons of cargo as follows: -

- General cargo 5.2 million tons.
- Container yard 6.8 million tons.
- Liquid bulk 6.0 million tons.

The Proposed Kerui Foam and Sponge Manufacturing Plant will therefore be taking advantage of the intrinsic factors mentioned above while at the same time leveraging on the exciting environment located at Mkuranga for investment purposes.

The management has therefore thought it is prudent to establish and operate high quality and modern Foam and Sponge Manufacturing Plant that will serve this clientele.

What are the uses of foam and sponges based on above analysis? Market analysis shows that the key users and uses of these products will include:

- Packaging. Sponges natural malleability lends itself to packaging and packaging material. With the exponential growth of the logistics industry as well as manufacturing plants situated in the area, it follows that they will all need foam, sponge and related material for packaging purposes
- Insulation. Industry manufacture requires foam and sponge material for insulation, as raw material and sound proofing especially in industrial areas
- Upholstery. Foam and Sponges are also used as raw material for industries such as upholstery, furniture and fittings, mattresses and related industry.

Some examples of these products are highlighted below:

3. MARKET POTENTIAL

This clearly represents an opportunity for our organization to not only do profitable business but also provide high quality foam and sponge product to all our esteemed clientele.

This is also informed by below key factors as analyzed by the company.

Strategic Location

- **Port of Dar es Salaam:** As one of the largest and busiest ports in East Africa, Dar es Salaam handles a significant volume of cargo. A high quality foam and sponge manufacturing plant in close proximity to the port can streamline import and export activities, reducing costs and improving efficiency in provision of packaging products.
- **Regional Trade Hub:** Dar es Salaam serves as a gateway to several landlocked countries in East Africa, including Uganda, Rwanda, Burundi, and the Democratic Republic of Congo. High quality foam and sponge can attract businesses from these countries looking for reliable access to international markets and spin off new industries in related sectors such as furniture and fittings

Economic Growth

- **Tanzania's Growing Economy:** Tanzania has been experiencing steady economic growth, driven by sectors such as mining, agriculture, and tourism. Increased economic activity generates higher demand for foam and related sponge products.
- **Infrastructure Development:** The Tanzanian government is investing in infrastructure improvements, including road networks, railways, and port facilities. These investments enhance the viability of logistics operations.

Business Environment

- **Ease of Doing Business:** Tanzania has been making efforts to improve its business environment. Simplified regulatory procedures, investment incentives, and a stable political climate can attract both local and international businesses to set up operations.
- **Industrialization Agenda:** Tanzania's industrialization agenda aims to boost manufacturing and processing activities. This shift will increase the demand for packaging and related materials and services.

4. THE COMPANY'S OBJECTIVES

Proposed Design Plan for the Foam and Sponge Manufacturing Plant

The proposed facility is designed to be located at that property currently known and registered as Plot 94, Kazole, Vikindu, Mkuranga, Pwani Region, Tanzania.

The proposed infrastructure development for Kerui Foam and Sponge Manufacturing Plant aims to create a state-of-the-art facility that supports industrial manufacturing plant while promoting local skills transfer.

Drawing inspiration from like-minded projects in the region, the infrastructure at Kerui Foam and Sponge Manufacturing Plant will prioritize the establishment of modern eco-friendly manufacturing plant solutions, leveraging on ICT and modern foam manufacture techniques.

The development will also include environmentally sustainable features to support energy efficiency and reduce the carbon footprint of the manufacturing plant.

The project will be a foam and sponge manufacturing plant designed to streamline supply chain operations through provision of quality foam and sponge products for especially packaging industry.

This focus on packaging materials aligns with the modern demands of global trade, ensuring that companies who use the facility can efficiently manage their packaging and related needs.

Ultimately, Kerui Foam and Sponge Manufacturing Plant aims to be a catalyst for economic transformation, creating employment opportunities and attracting both local and foreign investments. With a strategic focus on export-led growth, the development is set to position the foam and sponge manufacturing plant as a key player in enhancing Tanzania's industrial output and increasing its competitiveness in the global market

FULLY OPERATIONAL PROJECT	

6. CAPITAL INVESTMENT COST

Projected capital requirements for Phase I of the project are highlighted below. We envisage a balanced mix of shareholder equity and external financing if required from banks.

Our expected capital to asset ratio is within desired capital adequacy ratio designed to promote adequacy of the operations.

This projections are highlighted below.

S/No	Source of Capital	Projected Amount (In USD)
01	Shareholders' Equity - Lease and Construction, Plant Installation	500,000.00
02	Equity Mix/ Capital Equipment Lease	900,000.00
Total Projected Equity/Capital for the Project		1,400,000.00
		United States Dollar One Million, Four Hundred Thousand Only

8. FINANCIAL PLAN AND USE OF FUNDS

Projected expenditure for the project inclusive of startup costs are highlighted as structured below:

- **GENERAL ASSUMPTIONS**

The Company has the following key assumptions which guide this investment decision.

- a) A steady exponential growth curve based on market demand for our finished products;
- b) Fixed facilities costs which do not fluctuate with more than 10% deviation;
- c) New age technological tools and equipment designed to meet and match equipment utilization and capacity needs.

- **SALES FORECAST**

The company envisages a conservative sales forecast of 74% equipment utilization within a 7-day work week. This is well within normal manufacturing plant industry estimates of eighty (80%) percent capacity utilization.

We however estimate that we shall start at a conservative figure of twenty (20) percent gradually increase reaching peak production capacity of eighty-eight (88%) percent peak average daily.

Based on performance metrics we believe we can incorporate cold chain packaging products or design and manufacture complex foam or sponge material products within our facility in a span of 3 years based on the strength of in-house experience, production stabilization and economies of scale.

This translates to estimated sales unit of

Capacity of facility based on design of plant and machinery to be installed at the facility available

Utilization at 70% capacity = 50 tonnes available per Month X 12 Months = 420 Tonnes Capacity sold Annually

Units Produced Annually	Sale Price Per Unit	Projected Annual Revenue
600 tonnes capacity	3,864,000 Tshs. per Ton (conservatively cheaper than comparative imported product at compared market rates of 5,000 Tshs per kg)	2,318,400,000.00
Projected Annual Revenue		2,318,400,000.00
		Tanzania Shillings Two Billion, Three Hundred and Eighteen Million, Four Hundred Thousand Shillings Only

This projection also does not quantify expected revenue from the below streams of income namely:

- Support Industries who rely on the manufacturing component from the industries located on site
- Packaging Materials Consultation Revenue
- Specialized Client Needs
- Cold Chain Packaging Products (to be manufactured on site in future)
- E- Commerce clients who can use our facility for inventory management

These are conservatively expected to bring in at least and extra 15% of total revenue for the establishment.

Our projected Year on Year growth curve once the project is fully operational would be as below:

- **STARTUP COSTS**
