**Re: APPLICATION FOR EXTENSION OF TIME FOR THE CERTIFICATE OF INCENTIVE**

Reference is made to the captioned above

Kilimanjaro International Leather Industries Company Limited (KLICL) was incorporated on the 30<sup>th</sup> May 2021 with the main objective of engaging in manufacturing of Leather and leather related products at Karanga area within Moshi Municipality.

The project was registered and issued with a Certificate of Incentive No. 017114 operative until 19<sup>th</sup> May 2023 following change of Company's name. However, the project is still ongoing with establishment of the tannery factory hence the instant application is on account of the following factors;

1. The Company executed contract No. PA.158/2019/2020/HQ/W/01-LOT2 for establishment of the Tannery factory which despite expiry of the completion period, to date the project is yet completed whereas the overall completion status is apparently at 92%.
2. In the meantime operation of the Tannery can hardly commence until full completion of the Effluent Treatment Plant (ETP) project which is under construction by Moshi Urban Water Supply Authority (MUWSA) designed for treatment of industrial waste for its re use and safe disposal to the environment. The project is also ongoing with expectation of full completion by end of the next month.
3. Further, the Company shall also be required to procure additional machines, spare parts, accessories and chemicals from our suppliers of machines at Italy to facilitate installation, testing and commissioning of the machines for the Tannery factory.

In view thereof, we humbly request for extension of time for a period of 24 months to complete the project and re issue of the certificate portraying the extension.

We sincerely appreciate for your convivial cooperation.

Donald Nkomavantu  
**For. MANAGING DIRECTOR**
