RE: APPLICATION FOR REGISTRATION OF IRON AND STEEL MANUFACTURING PROJECT

Reference is made to the above subject.

We, **PAK STEEL MILLS LIMITED**, hereby respectfully submit our formal application for registration of our proposed iron and steel manufacturing project with the Tanzania Investment and Special Economic Zones Authority (TISEZA).

The company intends to establish a modern iron and steel manufacturing facility in Tanzania dedicated to the production of steel bars, iron rods, structural steel materials, wire products, and other industrial steel products intended to serve the rapidly expanding construction, infrastructure, energy, transport, and industrial sectors within Tanzania and the wider East African region.

This project has been developed as a strategic industrial investment intended to contribute directly to Tanzania's industrial transformation agenda by reducing dependence on imported steel products, strengthening domestic manufacturing capacity, creating employment opportunities, promoting industrial technology transfer, and generating long-term economic value through local production.

The proposed investment is designed to incorporate modern production facilities including steel rolling lines, billet storage systems, material handling systems, cooling systems, loading bays, industrial maintenance units, and quality control systems capable of ensuring efficient and consistent production according to applicable industrial standards.

The company has undertaken detailed project planning covering investment structure, financial projections, production capacity, environmental compliance, manpower development, market analysis, and long-term operational sustainability. Based on current market demand and industrial growth trends, the project demonstrates strong viability and substantial contribution to national industrial supply chains, particularly in construction materials required for ongoing infrastructure expansion across Tanzania.

The project is expected to generate both direct and indirect employment opportunities for Tanzanians, support government revenue through taxation, stimulate associated industries including transport and logistics, and strengthen Tanzania's position as a regional manufacturing hub for steel and metal products.

We believe that registration under TISEZA will facilitate effective implementation of this strategic industrial investment by enabling access to the relevant investment support framework, industrial incentives, and institutional guidance necessary for successful project establishment.

We therefore kindly request your office to consider our application and grant approval for registration of this investment project. We are fully prepared to submit all supporting documentation including the business plan, company incorporation documents, financial information, project location details, and any further requirements that may be necessary to complete the registration process.

We highly appreciate your consideration and remain available for any clarification or further engagement required by your office.

Thank you in advance for your time and favorable consideration.

Yours faithfully,

For: PAK STEEL MILLS LIMITED

Director
