

THIMAR INVESTMENT LIMITED

Developing Strength for Tomorrow's Infrastructure

GREEN IRON & STEEL MANUFACTURING PROJECT

📍 Mtwara, Tanzania

Company & Project Overview

Thimar Investment Limited is developing a **state-of-the-art steel manufacturing facility** in Mtwara, Tanzania. This strategic project focuses on producing high-quality steel products to support the region's rapidly growing construction and infrastructure sectors.

With modern production technology and a commitment to excellence, the facility will serve as a cornerstone for **industrial development** in Southern Tanzania and surrounding markets.

Planned Products & Services

Our state-of-the-art facility will produce a comprehensive range of **high-quality steel products** to meet the diverse needs of construction and infrastructure projects across Tanzania and the region.

Reinforcement Steel Bars

High-strength deformed bars for concrete reinforcement in all types of construction projects, available in various diameters and grades to meet structural requirements.

Structural Steel Products

Beams, columns, channels, and angles for building frameworks and industrial structures with precise dimensions and superior strength.

Custom Steel Fabrication

Bespoke steel components and structures tailored to specific project requirements with advanced fabrication capabilities.

Bulk Steel Supply

Large-scale steel procurement and distribution for major infrastructure projects with reliable logistics and inventory management.

Industrial Steel Solutions

Specialized steel products and engineering support for industrial applications, including manufacturing equipment and machinery components.

Vision & Mission

Vision

To establish a **leading steel manufacturing facility** serving Southern Tanzania and regional markets.

- ★ Industry leadership
- 🌐 Regional market expansion
- ↗ Sustainable growth

Mission

To develop and operate a **modern steel factory** delivering reliable, durable, and cost-effective steel products.

- ⚙ Modern manufacturing
- ✅ Quality assurance
- 💰 Cost efficiency

Key Strengths

Our steel manufacturing project leverages **strategic advantages** and **operational excellence** to deliver superior value to our partners and stakeholders.

Strategic Industrial Location

Prime positioning in Mtwara with excellent access to ports, transportation networks, and regional markets.

 Port Access

 Transport Hub

 Regional Reach

Modern Manufacturing Approach

State-of-the-art production technology and innovative processes for enhanced efficiency and quality.

Quality-Focused Production

Rigorous quality control systems and international standards compliance for reliable steel products.

Reliable Supply Capability

Consistent production capacity and robust supply chain to meet demanding project timelines.

Long-Term Industrial Growth

Strategic focus on sustainable expansion and value creation for all stakeholders.

Sustainability & Responsibility

Our steel manufacturing project is built on a foundation of **environmental stewardship** and **responsible operations**, ensuring long-term value for all stakeholders.

"Sustainable steel manufacturing is not just about reducing our environmental footprint; it's about creating value through responsible practices that benefit our community and our planet."

— Thimar Investment Limited

Environmentally Responsible Manufacturing

Implementation of advanced emission control systems and waste reduction strategies to minimize environmental impact.

 Low Emission Technology

 Waste Minimization

Compliance with Industrial Standards

Adherence to local and international environmental regulations and industry best practices for responsible steel production.

 ISO Certification

 Regulatory Compliance

Efficient Resource & Energy Planning

Strategic implementation of energy-efficient technologies and resource optimization to reduce operational costs and environmental impact.

 Energy Efficiency

 Water Conservation

Contact & Summary

Thank You

We appreciate your interest in Thimar Investment Limited's Steel Manufacturing Project. We look forward to partnering with you to build a stronger future for Tanzania's infrastructure development.

Next Steps

- 1 Project Development**
Facility planning and construction
- 2 Equipment Installation**
Modern steel production technology
- 3 Market Launch**
Full-scale production and distribution
